GENEVE

G016 GD Grande Date Sport 5N

The Grande Date Sport in 5N red gold is a variant of the steel models, this time in black and gold hues creating a wicked duo.

With the retrograde second at 6 o'clock and big date at 12 o'clock, we once again encounter Pierre Kunz' emblematic watchmaking prowess.

The dial in deep black texalium is decorated with 5N "baignoire" style applied chapters with white Superluminova coating.

The hour and minute hands are engraved with the symbol of the brand and also feature a Superluminova coating to provide day and night visibility.

The crown is screwed down to assure water-resistance to 100 metres and integrated into the case for protection against shocks.

To guarantee impeccable precision, every movement of this sporty model comes with COSC chronometer certification.

Precious materials, play of textures and complication make this timepiece a veritable symbol of modernity.

Grande Date Sport 5N
